Skills

EXPERTISE
• Angular
• Node.js
• JavaScript
• TypeScript
• Express.js
• Nest.js
• MongoDB
• Ngrx
• Socket.io
• WebRTC
• AWS
• Git
• Data Structure
• Clean Architecture
• SOLID Principles
• HTML
• CSS
• Bootstrap
• MVC (Model-View-Controller)

ALSO USED
• Ajax
• MySQL
• EJS
• Postman
• Material UI
• Figma

DATABASES
• MongoDB
• PostgresSQL

INTEGRATIONS
• Twilio
• Firebase
• Multer
• Razorpay
• Cloudinary
• JWT(Json Web Token)

Education

MEAN Stack Development

📅 2023 - Present   📍 Calicut

HIGHER SECONDARY
EKNS ɢʜss
📅 2020 - 2022   📍 Kannur

Summary

As a highly skilled Full Stack Web Developer specialized in the **MEAN Stack**, showcasing expertise in **HTML/CSS and JavaScript**, as well as **Angular, Node.js, and TypeScript**. Focus on building RESTful APIs and scalable web applications.

Main Projects

SKILL-LEARN
Using this platform, users can both learn new skills and share their expertise, all while having the opportunity to earn income for their contributions.
- Built with **Angular** for the front-end and **Ngrx** for state management, **Node.js** and **Nest.js** on the server side, with **MongoDB** for database management and styled with **Bootstrap CSS**.
- **Razorpay** is seamlessly integrated to facilitate payments for a subscription system allowing users to access professionals' expertise.
- Added chat and video call features using **Socket.IO** and **WebRTC** for smooth user-professional interactions.
- Enabled professionals to assign tasks and schedule meetings, providing hands-on learning opportunities.

Mini-Projects

USER MANAGEMENT SYSTEM
- Designed a user management system using **Angular, Ngrx and JWT (JSON Web Token)**. It includes features such as user login, registration and admin panel.
- **GitHub-Link : github**

TO - DO LIST
- Designed a to-do list using **Angular**, featuring integration with a **JSON server**. It includes all the CRUD functionalities.
- **GitHub-Link : github**

NETFLIX-CLONE
- Netflix clone was built using **Angular and CSS**. The Netflix Clone includes features such as movie listing, displaying details of cast and search functionality.
- **GitHub-Link : github**

PASSWORD GENERATOR
- Designed a password generator application using the technology **Angular**.
- **GitHub-Link : github**
